

# CEBELIA

## L.C.E BALM

LABORATOIRES D'ANJOU IN PARIS HAVE DEVELOPED TWO PATENTED INGREDIENTS, LAMININ 5 AND PEKALINE, WHICH FEATURE IN THIS INNOVATIVE POST MEDICAL-AESTHETIC PROCEDURE DERMATOLOGICAL CREAM, DISTRIBUTED IN AUSTRALIA BY CRYOMED.

**P**atented derma-aesthetic skincare Cebelia L.C.E Balm provides expert post-surgical and post-procedural skin care that repairs, regenerates and decongests patients' skin.

The balm assists patients' lesions, contusions, redness and swelling to disappear rapidly.

From 75-95 per cent of the formula is natural active ingredients (glycerine from plants, almond oil, phytosqualane, olive oil, linden, chamomile, blackcurrant, horse chestnut).

Many plastic surgeons, aesthetic physicians and dermatologists are convinced of the quality and effectiveness of Cebelia products and include them in pre and post aesthetic care.

Doctors use it in aesthetic procedures: post-laser, pre and post-injection of fillers, aesthetic-surgery healing, post-mesolift in dermatological procedures: wounds, cracks, scrape lesions and sutures.

### KEY INGREDIENTS

**TEXTURE:** Silicon gel (33 per cent) protects superficial lesions and accelerates the regenerating process.

**HEALING:** CebelineÂ Laminin 5 active fragment that restores the mechanical and biological properties of the DEJ.

**ANTI-BRUISE:** Titrated extract of blackcurrant to increase capillary strength and improve microcirculation.

**ANTI-OEDEMA:** Escin extract (horse chestnut) to preserve capillary elasticity and permeability. Prevents venous insufficiency.

### INDICATIONS

In medical aesthetic procedures:

- Post aesthetic surgery (lifting, blepharoplasty, rhinoplasty)
- Pre and post injections, mesotherapy, thread lift
- Post laser (deep bruises)

In dermatological procedures:

- Wounds (even open)
- Mucous membrane (episiotomy)
- Cracks (pulpitis, dry eczema, diabetes) and cracks on the nipple (due to breastfeeding)
- Any bruise, contusion

### OTHER INDICATIONS

Eye contour (dark circles, eye bags, fine lines)
